

Advanced Security Package

**24/7 Threat
Protection and Expert
Support!**

Comprehensive Threat Protection

Leverage the power of Microsoft Defender for robust threat prevention, detection, and response, ensuring your data is safeguarded against potential security breaches.

Seamless Support & Coordination

Benefit from 24/7/365 assistance from our main endpoint security manager based in Virginia, who collaborates with Astoria's Tech Desk for efficient and effective security management.

Cloud-Based Security Management

Utilize Microsoft Intune for cloud-based security across all your devices, allowing you easy access while keeping threats at bay. Our team monitors all Windows logs, rapidly stopping and remediating threats in real time.

Safeguard Your Business with Our Comprehensive Threat Protection. Our robust solution guarantees the security of your data against potential breaches, utilizing advanced prevention, detection, and response capabilities. With our system implemented, you can feel secure knowing that your sensitive information is protected from ever-evolving threats.

Enjoy seamless support and coordination with our dedicated team, available 24/7/365 to offer expert assistance, all supported by Astoria's Tech Desk for effective security management. Experience cloud-based security across all devices, ensuring easy access while our team monitors Windows logs to quickly identify and address threats in real-time. Trust us for peace of mind throughout your cybersecurity journey!
